

License Agreement

1. Subject of the Agreement

This Agreement governs the use of the paid modules of Table, Bro (for example, Island Details): TypeScript/SCSS source code and built files, delivered through the private npm registry npm.table-bro.com (the "Modules").

The core library of Table, Bro, its skins and framework wrappers are open source under the MIT License and are not subject to this Agreement.

The owner of the product is Igor Novozenko, an entrepreneur registered in Poland under NIP: 8992914551.

Contact address: bro@table-bro.com.

2. License

For the Modules, a non-exclusive perpetual license is granted for one Product (section 4).

3. Restrictions

- It is prohibited to distribute, publish, or resell the Modules, in source or built form, original or modified, separately or as part of a component library, SDK, UI builder or other product for developers. Such a product may depend on the Modules, and every company that uses it needs its own license for each of its Products.
- It is prohibited to remove or alter the purchase number in the delivered package.
- The registry access token is confidential. It is prohibited to share it outside the licensee's company or to publish it.

4. Scope of the License

- The license is granted for one Product: one application under one name, including all its environments (development, testing, production), versions and installations, in the cloud or on-premises.
- A separate application requires a separate license, even if it belongs to the same service (for example, a customer portal and an admin panel).
- The same application offered under another brand (white label) requires a separate license for each brand.
- The number of developers, installations, domains and end users is not limited.
- The license is issued to the customer's email address, which is used for delivery, support and license management.
- Upon request, the licensee informs the owner in writing in which Products the licenses are used. If there are more Products than licenses, the licensee purchases the missing licenses.

5. Delivery

The Modules are installed from `npm.table-bro.com` with a registry access token sent to the customer's email address after purchase. Tokens are reissued and revoked upon the licensee's request from that email address.

6. Updates

All updates are provided free of charge for 1 year after purchase. After that, the licensee keeps the perpetual right to use the versions released during that year. Further updates require a new license.

7. Pricing

- Island Details — \$10.

8. Refunds

Refunds are available within 30 days after purchase.

9. Limitation of Liability

Products are provided "as is." The developer is not liable for any damages arising from their use. The total liability is limited to the amount paid for the license.

10. Termination

In case of a breach of this Agreement, the license terminates and the registry access tokens are revoked.

11. Personal Data

The customer's email address and the request log of the registry (country, network organization and user agent of the installing tool) are processed as described in the Privacy Policy.

12. Governing Law

This Agreement is governed by the laws of Poland.
